

# BUILDINGS 2020-013 BULLETIN OPERATIONAL

ISSUANCE DATE  
July 10, 2020

ISSUER: Gus Sirakis, P.E. *G. Sirakis*  
First Deputy Commissioner

PURPOSE: This bulletin describes when a DOB permit application is not required for the safe New York City Phase 2 reopening of restaurants and bars.

SUBJECT(S): Emergency Executive Order No. 126; Emergency Executive Order No. 128; Phase 2, Reopening; Open Restaurants Program; Restaurants; Bars; Food Establishments; Sidewalk; Yard; Parking Lots; Rooftop; Terrace; Place of Assembly Certificate of Operation

## RELATED EMERGENCY EXECUTIVE ORDERS: EO 126, EO 128

### I. Background

On June 18, 2020, Mayor Bill de Blasio issued **Emergency Executive Order No. 126 (EO 126)** for the Open Restaurants Program and the expansions of outdoor seating in Phase 2 of reopening. Emergency Executive Order No. 128 was issued on June 27, 2020 with additional information and modifications to EO 126. The following guidance describes the types of minor changes owners can make for the safe reopening of restaurants and bars without having to obtain a construction permit from the Department of Buildings.

### II. Outdoor Seating in Front of a Restaurant or Bar

For restaurants and bars seeking permission to place outdoor seating in front of their establishment on the sidewalk and/or roadway, please apply through [NYC Open Restaurant Program](#), comply with the requirements outlined in the guidelines and the conditions under the **Applications for DOB Permit Not Required** section below.

### III. Minor Modifications on Private Property *NOT* Requiring a DOB Permit

Where an establishment wishes to place outdoor seating on private property and complies with the conditions listed under the **Applications for DOB Permit Not Required** section below, there is no need to file with the Department of Buildings for the specified minor modifications.

### IV. Changes Affecting Code Compliance

The Department encourages restaurants and bars to perform minor modifications within the conditions listed under the **Applications for DOB Permit Not Required** section below so that there is no need to file with the Department.

Where modifications meet the conditions listed under the **Applications for DOB Permit Required** section below, applications for permits from the Department of Buildings are required. Additional information on obtaining a permit is available at [www1.nyc.gov/site/buildings/business/how-to-obtain-a-permit.page](http://www1.nyc.gov/site/buildings/business/how-to-obtain-a-permit.page). Alternatively, the Department offers a [Professional Certification Program](#)

which enables Professional Engineers (PE) and Registered Architects (RA) to certify that the plans they file with the Department comply with all applicable laws. This reduces the amount of time a builder normally has to wait for a DOB permit by eliminating the process of Department plan examination and approval.

## V. Maintaining Social Distancing, Building Safety and Accessibility

Ensure compliance with social distancing required by the State's [Interim Guidance For Outdoor and Take-Out/Delivery Food Services During The Covid-19 Public Health Emergency](#) guidance. In any case, do not provide less than 15 SF per person when tables and seating are provided in yards\*, roofs and parking lots.

*\*NOTE: Where the only exit from a yard passes through an interior space, the number of occupants in the yard must not exceed 74 persons. Roofs without occupancy listed on Certificate of Occupancy or Place of Assembly Certificate of Occupancy (PACO) must apply to DOB.*

All other Building Code safety requirements remain in effect and must be observed. Accessible routes and features must also be maintained in buildings and outdoor spaces as part of Phase 2 of reopening.
